

admission of an alien to  
so far as no express pro-  
be by Act of Congress is  
material."

that the custom of the  
these persons were nat-  
ural, up to 1856, to note the  
in the minutes. But  
this was simply an index.  
This was far less formal  
than the manner of re-  
verified to by Clerk  
Yet Judge Friedman  
it "fully answered the  
the law." And he said

therefore, if a defect in the  
act in consequence of the  
some ministerial act by  
the United States Govern-  
ment, or absence of a law declaring  
that could not affect it  
it."

absence of an entry in  
a minute book could be  
defect, this one which is insi-  
lent whose disregard is defi-  
nitely every consideration of  
law. Indeed it is one of the  
main principles of the law that  
is the guardian of its own  
a matter of its own prac-

good common sense, as  
and legal doctrine. And  
a rule in Utah as well as  
New York. The omission of a  
proper record the natural  
of many aliens, although  
stated in court and were  
affiliated to citizenship and  
affiliation with the soil of  
has been unjustly made to  
against those citizens, and  
been excluded by "ali-  
enage from the rights to  
they were legally entitled.

officials are all, in the same  
a Murray and his apologists,  
it surely come under the  
denunciation and public con-  
A party that steals into  
such tricks and deceptions  
which total 1,000 count for  
the 10,000, by striking from  
so many names of registered  
not placing thereon so many  
clients as are necessary for  
us, that schemes to take the  
so from all who will not vote  
candidates, that buys votes  
in ballot boxes and rewards  
for the most villainous acts,

An ordinance recently passed  
by the City Council prohibits, under  
penalty of the infliction of a penalty,  
any person within the corporation  
limits from kindling fire for the  
consumption of rubbish during any  
other hours than between six A.M.  
and twelve noon.

This is as far as good, as evening  
and night are times when works are  
observed are liable to be thrown about  
and to set contiguous materials and  
buildings afire.

There are two points, however,  
that are of equal or even still  
greater importance that should  
not have been overlooked. One  
is, that no such fire should  
be kindled within a prescribed dis-  
tance, presumed to be safe, from any  
building or inflammable material.  
This is especially necessary in sum-  
mer weather, when everything in  
the shape of wood is as dry as fir-  
er, so to speak. In that condition  
a single spark would be sufficient to  
originate a fire that would consume  
a whole block.

The other point of importance is  
that it should be made unlawful, un-  
der any circumstance, for young  
children to kindle and maintain  
rubbish or other such fires within  
the corporate limits, as they are not  
supposed to have sufficient judg-  
ment to realize the existence of  
danger. We have seen neighbor-  
hoods kept in a condition of dread  
in consequence of small children  
being allowed by their parents to  
light fires close to premises that  
might easily have been set afire  
and communicated to other buildings.  
This is especially applicable to  
the northeastern part of the city,  
where there are no facilities for  
extinguishing fires, owing to the water  
streams from the hydrants being  
more difficult.

## RAILROAD IN PALESTINE.

A PRIVATE correspondent from  
Jaffa, Palestine, Mr. J. V. Distric,  
states, in a letter dated June 21st,  
that the long-talked-of railroad be-  
tween Jaffa and Jerusalem is to be  
finished in the course of two years  
from now. The work of grading is  
progressing rapidly. The first  
locomotive ever seen in the Holy  
Land is expected in Jaffa this  
month, from New York. There is  
now a railroad line

the new passenger or mail train  
gun for driving cattle from railroad  
tracks. A nozzle is attached to the  
front end of a locomotive boiler,  
with a handle leading back to the  
cabin. Through this nozzle a stream  
of hot water and steam is thrown at  
will, and by means of a handle the  
operator can direct the stream toward  
any part of the track in front of the  
locomotive.—*The Daily Standard*.

## Deseret Evening News

OAKLAND Aug. 13 1890

Last Sunday morning the body of  
a dead man was discovered lying at  
the point of a bar near of the  
waterworks plant, in the Bear  
creek, about four miles from Grand  
junction. An inspection of the body  
was held and it was learned that the  
man's name was Charles Vandever,  
an Indian pupil of the school. How  
he met his death is not known, but  
it is supposed that he had gone out  
with some Indian boys and fallen  
into the river near the canyon. The  
remains were interred in the Pollard's  
field at the cemetery.

Last Saturday evening little Nellie  
McPhayle, who has been spending  
some time at Clearmont, kissed her  
mother good-night on going to sleep,  
and never awakened on earth. Nellie  
was about 14, but being de-  
formed from birth, was very small  
of her age, and though having a  
great terror of death, was a devout  
Catholic. The cause of her death  
is a mystery, but supposed to be  
heart failure. She was brought to  
Grand Junction Sunday and buried  
Monday evening.—Grand Junction  
Star.

Last Sunday about noon M. L.  
Roberts, the jeweler, had a narrow  
escape from instant death. He and  
Moses, Harry and Petrie, of the  
friggit depot, went up to the Black  
Canyon on a fishing expedition.  
Mr. Roberts had become sep-  
arated from his companions, and  
while standing a moment on the  
railroad track debating which direction  
to take, was suddenly struck  
down by a rock which fell from the  
wall of the canyon above. How  
long he was unconscious he of  
course does not know, but when he  
revived he was lying with his feet  
across the rail. He got up and had  
been sitting on the ground a moment  
when a passenger train came thunder-  
ing along. If he had been a few  
minutes longer in recovering con-  
sciousness, he might have been  
killed by the train. The force of the  
falling rock made a wide hole  
about the size of a silver quarter, but  
made from a distance on the right  
side of his head, no other injury  
was inflicted.—Grand Junction Star.

Harrison P. Shuler, a colored  
boy, was bathing with two other  
boys at Los Angeles Wednesday af-  
ternoon. He pushed a log into the  
water while the other boys were in

the water when they were  
inaking part in the r  
of the log when they  
died that only fifty six  
employed. A number  
were discharged are em
